THERMOCHIMICA ACTA, VOLUME 38 (1980)

SUBJECT INDEX

Acetals,
enthalpies of mixing of — with *n*-alkanes, benzene and carbon tetrachloride (Meyer et al.) 197
Adsorption isotherm,
the effect of heat treatment on the adsorption properties of solids. II. The effect of heat treatment on the character of the — (Dollimore et al.) 15
Adsorption properties of solids,
the effect of heat treatment on the —. I. Introduction (Dollimore) 1
Adsorption properties of solids,
the effect of heat treatment on the —. II. The effect of heat treatment on the character of the adsorption isotherm (Dollimore et al.) 15
Alaskan crude oil,
a thermogravimetric method for distinguishing — from that of other world sources (Dyszel) 299
Alkali metals,
Studies on double selenates. I. Thermal decomposition of lanthanum and — double selenates (Ionashiro, Giolito) 285
Alkali metal selenates,
thermal decomposition of — (Giolito, Ionashiro) 341
Alkaline-earth carbonates,
study of the thermal decomposition reaction mechanism of — under high vacuum by both thermogravimetric analysis and constant decomposition rate thermal analysis techniques (Criado et al.) 117
n-Alkanes,
enthalpies of mixing of acetals with —, benzene and carbon tetrachloride (Meyer et al.) 197
Amine hydrothiocyanates,
studies on —. III. Heats of fusion (House et al.) 349
Ammonium polyphosphate,
a thermogravimetric study of the flame retardant system Cyagard® RF-1/— (Ferrillo, Granzow) 27
Antimony(III) bromide,
thermal decomposition of complexes of — with hydrobromides of some aromatic amines (Ptaszyński) 277
Aromatic amines,
thermal decomposition of complexes of antimony(III) bromide with hydrobromides of some — (Ptaszyński) 277
Arsenides,
preparation, characterisation and thermal stability of germanium and silicon — (Hillel et al.) 259
AuCa compounds,
potentiometric determination of the free enthalpies of formation of — (Notin et al.) 173
Benzene,
enthalpies of mixing of acetals with *n*-alkanes, — and carbon tetrachloride (Meyer et al.) 197
Bivalent metal ions,
heterocyclic hydroxamic acids. V. Thermodynamics of the interaction of some — with *N*-phenyl-2-furohydroxamic acid and its analogues (Abbasi) 335
Bromates,
thermodynamics of the chlorides, bromides, nitrates, —, iodates and sulphates of potassium and sodium in dioxane—water mixtures from conductance data at different temperatures (Das et al.) 245
Bromides,
thermodynamics of the chlorides, —, nitrates, bromates, iodates and sulphates of potassium and sodium in dioxane—water mixtures from conductance data at different temperatures (Das et al.) 245

Cadmium—lead system,
phase diagram and thermodynamic properties of the — (Schuffenecker et al.) 89
Calcite,
influence of foreign materials upon the

thermal decomposition of dolomite, — and magnesite. Part I. Influence of sodium chloride (Wieczorek-Ciurowa et al.) 157
Calcite,
influence of foreign materials upon the thermal decomposition of dolomite, — and magnesite. Part II. Influence of the presence of water (Paulik et al.) 165
Carbon tetrachloride,
enthalpies of mixing of acetals with *n*-alkanes, benzene and — (Meyer et al.) 197
Cellulose acetate,
microstructure and permeability of "dense" — reverse osmosis membranes (Arneri et al.) 139
Ceramic fibres,
the applicability of DTA to the study of the crystallisation process of — (Sopicka-Lizer, Pawłowski) 293
Chlorides,
thermodynamics of the —, bromides, nitrates, bromates, iodates and sulphates of potassium and sodium in dioxane—water mixtures from conductance data at different temperatures (Das et al.) 245
Constant decomposition rate thermal analysis,
study of the thermal decomposition reaction mechanism of alkaline-earth carbonates under high vacuum by both thermogravimetric analysis and — techniques (Criado et al.) 117
Constant decomposition rate thermal analysis,
thermal decomposition reactions in solids: comparison of the — with the conventional TG method (Criado et al.) 109
Crystallisation process,
the applicability of DTA to the study of the — of ceramic fibres (Sopicka-Lizer, Pawłowski) 293
Cuprous chloride,
reactions of — with container materials at elevated temperature (Etter, Wiedenheft) 351
Cyagard® RF-1,
a thermogravimetric study of the flame retardant system —/ammonium polyphosphate (Ferillo, Granzow) 27

Desorption curves,
study of the "shape index" in the analysis of temperature-programmed — (Criado et al.) 37
Dimethylsulfoxide—water mixtures,
study of the effect of the medium on the reaction constants for the dissociation of nitrophenols in — at 25°C (Rodante) 311
Dioxane—water mixtures,
thermodynamics of the chlorides, bromides, nitrates, bromates, iodates and sulphates of potassium and sodium in — from conductance data at different temperatures (Das et al.) 245
Dolomite,
application of thermogravimetric analysis to the calcination of — at high pressures (Rogan, Li) 125
Dolomite,
influence of foreign materials upon the thermal decomposition of —, calcite and magnesite. Part I. Influence of sodium chloride (Wieczorek-Ciurowa et al.) 157
Dolomite,
influence of foreign materials upon the thermal decomposition of —, calcite and magnesite. Part II. Influence of the presence of water (Paulik et al.) 165
Double selenates,
studies on —. I. Thermal decomposition of lanthanum and alkali metal — (Ionashiro, Giolito) 285

Exothermic processes,
sensitive detector of — (Sedex) (Hakl) 253

Flame retardant system,
a thermogravimetric study of the — Cyagard® RF-1/ammonium polyphosphate (Ferrillo, Granzow) 27
Flash vacuum thermolytic studies,
an effective approach to — (Carlsen, Egsgaard) 47

Germanium arsenide,
preparation, characterisation and thermal stability of — and silicon arsenide (Hillel et al.) 259
Gypsum,
the correlation between weight loss and phase composition of the calcination products of — (Khalil) 329

Hydrobromides,
thermal decomposition of complexes

of antimony(III) bromide with — of some aromatic amines (Ptaszyński) 277
Hydroxamic acids,
heterocyclic —. V. Thermodynamics of the interaction of some bivalent metal ions with *N*-phenyl-2-furohydroxamic acid and its analogues (Abbasi) 335

Iodates,
thermodynamics of the chlorides, bromides, nitrates, bromates, — and sulphates of potassium and sodium in dioxane—water mixtures from conductance data at different temperatures (Das et al.) 245

$KMnO_4$,
effect of metal oxide additives on the thermal decomposition of — (Abd El-Salaam, Hassan) 271

Lanthanum,
studies on double selenates. I. Thermal decomposition of — and alkali metal double selenates (Ionashiro, Giolito) 285
Lead—cadmium system,
phase diagram and thermodynamic properties of the — (Schuffenecker et al.) 89
Liquid evaporation rate,
new results on the dependence of the — on the pressure of its vapour (Bertrand et al.) 67
Liquidus curves,
a thermodynamic method for the derivation of the solidus and — from a set of experimental liquidus points (Bouwstra et al.) 97
Liquidus points,
a thermodynamic method for the derivation of the solidus and liquidus curves from a set of experimental — (Bouwstra et al.) 97

Madelung constant,
an averaging process for calculating the — from the ion grouping method (House, Lundeen) 347
Magnesite,
influence of foreign materials upon the thermal decomposition of dolomite, calcite and —. Part I. Influence of sodium chloride (Wieczorek-Ciurowa et al.) 157
Magnesite,
influence of foreign materials upon the thermal decomposition of dolomite, calcite and —. Part II. Influence of the presence of water (Paulik et al.) 165
Metal ions,
thermal properties and spectroscopic characteristics of the complexes of pyrazine-2-carboxylic acid with divalent — (Magri et al.) 225
Metal oxides,
effect of — additives on the thermal decomposition of $KMnO_4$ (Abd El-Salaam, Hassan) 271
Morpholinium perchlorate,
thermal behaviour of — (Udupa) 241

Nickel chelates,
vapor pressures by differential thermal analysis: application to some — (Charles) 315
Nitrates,
thermodynamics of the chlorides, bromides, —, bromates, iodates and sulphates of potassium and sodium in dioxane—water mixtures from conductance data at different temperatures (Das et al.) 245
Nitrophenols,
study of the effect of the medium on the reaction constants for the dissociation of — in water—dimethylsulfoxide mixtures at 25°C (Rodante) 311
N-Phenylbenzohydroxamate,
thermal analysis of rare earth complexes of — (Agrawal) 153
N-Phenyl-2-furohydroxamic acid,
heterocyclic hydroxamic acids. V. Thermodynamics of the interaction of some bivalent metal ions with — and its analogues (Abbasi) 335
Polyurethane,
the degradation of — (Barendregt, van den Berg) 181
Pyrazine-2-carboxylic acid,
thermal properties and spectroscopic characteristics of the complexes of — with divalent metal ions (Magri et al.) 225

Rare earth complexes,
thermal analysis of — of *N*-phenylbenzohydroxamate (Agrawal) 153
Reverse osmosis membranes,
microstructure and permeability of "dense" cellulose acetate — (Arneri et al.) 139

Sedex,
sensitive detector of exothermic processes (—) (Hakl) 253
Selenates,
thermal decomposition of some alkali metal — (Giolito, Ionashiro) 341
"Shape index",
study of the — in the analysis of temperature-programmed desorption curves (Criado et al.) 37
Silicon arsenide,
preparation, characterisation and thermal stability of germanium arsenide and — (Hillel et al.) 259
Sodium chloride,
influence of foreign materials upon the thermal decomposition of dolomite, calcite and magnesite. Part I. Influence of — (Wieczorek-Ciurowa et al.) 157
Sodium hexahydroaluminate,
study of the thermal behaviour of sodium tetrahydroaluminate and — from 298 to 600 K (Claudy et al.) 75
Sodium tetrahydroaluminate,
study of the thermal behaviour of — and sodium hexahydroaluminate from 298 to 600 K (Claudy et al.) 75
Solid complexes,
a proposed mechanism for the thermal reactions in — (House) 59
Solidus curves,
a thermodynamic method for the derivation of the — and liquidus curves from a set of experimental liquidus points (Bouwstra et al.) 97
Sulphates,
thermodynamics of the chlorides, bromides, nitrates, bromates, iodates and — of potassium and sodium in dioxane—water mixtures from conductance data at different temperatures (Das et al.) 245

Thermal decomposition reactions,
— in solids: comparison of the constant decomposition rate thermal analysis with the conventional TG method (Criado et al.) 109
Thermal decomposition reaction mechanism,
study of the — of alkaline-earth carbonates under high vacuum by both thermogravimetric analysis and constant decomposition rate thermal analysis techniques (Criado et al.) 117
Thermoacoustimetry,
an automated technique for — of solids (Mraz et al.) 211
Thorium tetrabromide,
vaporisation thermodynamics of — (Singh et al.) 235

Water,
influence of foreign materials upon the thermal decomposition of dolomite, calcite and magnesite. Part II. Influence of the presence of — (Paulik et al.) 165
Water—dimethylsulfoxide mixtures,
study of the effect of the medium on the reaction constants for the dissociation of nitrophenols in — at 25°C (Rodante) 311
Water—dioxane mixtures,
thermodynamics of the chlorides, bromides, nitrates, bromates, iodates and sulphates of potassium and sodium in — from conductance data at different temperatures (Das et al.) 245
